

While at The Pankey Institute, your dentist meets with the best dentists and dental instructors from around the world, and enjoys learning in the fellowship of others who love what they do.

You may desire extensive changes in your oral health and appearance but are concerned about the investment you will be making. Will it have the desired results? Will you be happy?

**It is important to know that the best dentists will always be concerned about what is in your best interest in terms of long-term health and beauty. Pankey trained dentists also are interested in your personal concerns and preferences. Your Pankey trained dentist will take time to listen, build trust, and help you become a partner in understanding and planning your dentistry.**

YOUR DENTIST IS A PANKEY  
INSTITUTE TRAINED DENTIST WHO  
CAN BE FOUND ON THE WEB AT:

YOUR DENTIST  
TRAINED AT  
THE PANKEY  
INSTITUTE.

WHAT DOES THAT  
MEAN TO YOU?

**The Pankey Institute** is a nonprofit educational center for dentists. It was founded by The L.D. Pankey Dental Foundation, Inc., in 1969.

**The mission** of the Foundation is to improve the health and well-being of the world's citizens by helping dentists achieve professional excellence and fulfillment. Through continuing education courses, the Institute assists dentists in developing their dental practices to reflect the following values:

- ◆ **Each patient is an individual** with unique needs, conditions and desires. This unique person is a responsible **partner** in helping the dental team understand his or her unique oral health situation and achieving best results.
- ◆ Patients should be **informed about the optimal oral health and esthetics available** to them and about treatment options that will help them achieve long-lasting, predictable results.
- ◆ Patients should be **helped in making appropriate decisions** for themselves, and offered exceptionally well-planned solutions that will allow them to have fine dentistry in phases over time.

The Pankey Institute continuously enhances its **educational curriculum** so its attending dentists can incorporate **advancing knowledge** in their dental practices – knowledge that enables them to treat the most complex cases with confidence, as well as the simplest problems with the whole person in mind.

Pankey-trained dentists are taught how to create a practice that reflects the highest professionalism. Your Pankey-trained dentist will discuss treatment options, answer questions fully, and counsel you on making appropriate choices.

Our continuing dental education is based on the standard of optimal oral health care. **What is optimal care?**

- ◆ It's personalized to your needs.
- ◆ It's a caring attitude.
- ◆ It's about complete examinations and treatment that take into account all components of the mouth and their functioning interrelationships.
- ◆ It's about asking questions to understand you and your oral health.
- ◆ It's about eliminating discomfort you may be experiencing – physically and emotionally.

Optimal care means bringing you to a level of health, comfort and appearance you may never have experienced before. It leads to a beautiful, healthy mouth with a well-functioning bite... it leads to dentistry that lasts.

At The Pankey Institute, we provide advanced training that enables dentists to solve complex oral health problems and restore teeth to a natural-looking aesthetic appearance with predictable results. Your dentist's goals are to educate you about how to prevent problems and maintain oral health; help you achieve improved health, function and appearance; and provide you with the opportunity to choose treatment that maximizes your health comfort and beauty for life.

At the world's oldest and most prestigious learning center for dentists, we deliver the highest quality postgraduate training to ensure your dentist and future generations of dentists can provide the highest benefits to patients around the globe.
